

Lorenzo Ignacio Guzmán Orellana

FullStack Developer

[Portfolio](#) · [linkedin.com/in/liguzmanorellana/](https://www.linkedin.com/in/liguzmanorellana/) · +569 9903 9993 · guzmanorellanap@gmail.com

Creativeness, perseverance, a great sense of compromise and passion for continuously learning are key factors of my mindset, always striving for personal and collective growth in all the challenges I take upon. I see myself as someone with swift adaptability to demanding environments and a critical approach to them.

PROJECTS

PuduPedia - Guia de ecosistemas terrestres chilenos

June 2024 – August 2024

Web Developer

Complete development of an interactive website which aims to raise awareness and provide information about Chile's endemic flora and fauna. In accordance with the Sustainable Development Goals of the United Nations.

- Use of various technologies for the operation, responsiveness and data storage of the page. FrontEnd elaborated with HTML, CSS, and JavaScript with React framework. BackEnd made with Node, Express and MySQL.
- Layout, feasibility analysis, information gathering and website planning with the help of tools such as Canva, Figma, Google Forms and Microsoft Office environment.
- Tasks approached as a team during the complete process, rotating roles and applying agile methodologies such as Scrum and Kanban, simulating a real work environment. Working and collaborating on Git/GitHub for version controlling along tasks overview and delegation on Jira.
